☐

 **None**
Create an app with combinations of consumer and business permissions and products.

☐

Next

Choose the Manage Business Integrations option;

7.Fill in the App Display Name field with your store's name;

8.In App Purpose, choose the option that best meets the needs of your store;

9.Click on Create App ID;

Add details

Display name

This is the app name associated with your app ID.

App Contact Email

This email address is used to contact you about potential policy violations, app restrictions or steps to recover the app if it's been deleted or compromised.

App Purpose

This app's primary purpose is to access and use data from Facebook's Platform on behalf of:

☒ Yourself or your own business

☐ Clients

If you are developing an app that accesses and uses data from Facebook's Platform on behalf of clients, you are subject to [Section 5b of the Platform Terms](#).

Business Manager account · Optional

In order to access certain aspects of the Facebook platform, apps may need to be connected to a verified Business Manager account.

No Business Manager Account selected

By proceeding, you agree to the [Facebook Platform Terms](#) and [Developer Policies](#).

11.In Products, on the left side dashboard, click Facebook Login > Settings.

Set the options as in the image below:

You are currently editing a test version of **test app**

Your app has standard access to public_profile. To use Facebook Login, switch public_profile to advanced access. [Get Advanced Access](#)

Client OAuth settings

☒ Yes

Client OAuth login
Enables the standard OAuth client token flow. Secure your application and prevent abuse by locking down which token redirect URIs are allowed with the options below. Disable globally if not used. [\[?\]](#)

☒ Yes

Web OAuth login
Enables web-based Client OAuth Login. [\[?\]](#)

☒ Yes

Enforce HTTPS
Enforce the use of HTTPS for Redirect URIs and the JavaScript SDK. Strongly recommended. [\[?\]](#)

☐ No

Force Web OAuth reauthentication
When on, prompts people to enter their Facebook password in order to log in on the web. [\[?\]](#)

☐ No

Embedded Browser OAuth Login
Enable webview Redirect URIs for Client OAuth Login. [\[?\]](#)

☒ Yes

Use Strict Mode for redirect URIs
Only allow redirects that exactly match the Valid OAuth Redirect URIs. Strongly recommended. [\[?\]](#)

Valid OAuth Redirect URIs

A manually specified redirect_uri used with Login on the web must exactly match one of the URIs listed here. This list is also used by the JavaScript SDK for in-app browsers that suppress popups. [\[?\]](#)
